Wood furnishes containers for food, drinking vessels, milking vessels, mortars, pestles, tent stakes, crosspieces and boards for making saddles. The Ahaggar does not have more than five or six species of woods which can be worked, and the articles, very simply shaped, are much less varied than in the Sudanese tribes.

All Ahaggar women, noble or vassal, know how to tan, remove hair from, sew, decorate, and embroider leather. They are able to make a waterskin needed to carry water, prepare skins to make tents, and manufacture bags for transporting food and personal objects. They have all become so expert in these labors that it is

Fig. 47. Amoula, a little wooden "bottle" for young children to drink from.

difficult to find any other peoples in the world who possess such a developed leather craft.

The scarcity of vegetable materials in the Ahaggar is one of the reasons why the use of esparto is relatively restricted. Only the stems of a graminacea common in the wadies (Panicum turgidum) are used to make mats -- large enclosing mats which surround the tent, sleeping mats, mats for covering plates.

/278/ The stems are bound by little leather thongs, and the combination of graminacea and leather is extremely effective; it allows very regular geometric decorations at the same time as a very solid work.

There are no esparto vans among the Tuareg. The women use palm-leaf vans and hats, but these articles are the work of the Harratin from the little palm groves of Silet, Ideles, and Abalessa.

841 The cessation of the menses during pregnancy is interpreted
843 discerningly, that is, that the baby is fed by the discharge and rejects the waste products from it at birth (placenta).

When a woman cannot have a child, her husband goes to find
842 a marabout who sells him an amulet which the woman must wear
[788] next to her skin. The wife, for her part, goes to pray near old
[782] tombs known to be those of venerated people. She asks God's
769 pardon for her faults and asks death to intercede for her with the creator. If the woman conceives, the husband takes the marabout
[431] an offering which sometimes consists of as much as several head of livestock.

After confinement the wife has no sexual relations with her
846 husband for a month and ten days. On the fortieth day the husband
834 makes his wife a present of sandals and new clothing.
431

Nursing lasts on the average from two to two and one-half
662 years. Boys, however, are weaned six months later than girls, for they are more fragile, it seems, and need stronger food.

In camp the young child is placed on a cushion, lying on his
854 stomach, and kept in place by a cloth band which passes over his loins and ties under the cushion. His wrists are also sometimes attached. Sometimes a wooden frame made of arches is placed over him; it holds up cloths and protects him from flies, light,
[184] and sandstorms, all at the same time. The Ioullimmiden Tuareg use little cradles which are hooked to the arches of the tent.

At moving time the mother carries her child on her back or on her hip, held by a loincloth knotted over the breasts. This
[171] method, also used by the Sudanese, does not seem to disturb the child, in spite of the /286/ mother's movements, which are some-
[853] times quite sudden. If he cries, she nurses him until all the milk is gone; there is no question of hours or measure for feedings.

The long nursing period as well as the carrying system causes
826 the woman's breasts to sag rapidly after the first child. For the
851 Tuareg, however, aesthetics count less than motherhood, which
517 ennobles the woman.
